Hours Saved

Overview

We've reviewed your professional background against your university's current syllabus.

The verdict: you already possess the real-world experience required to pass the units listed below.

This report is your exact roadmap to getting these units officially waived. Follow these steps to cut down your tuition costs and accelerate your graduation.

Unit 1: ACCE1003 - Engineering Finance

BASIS OF WAIVER:

Your real-world experience managing budgets, timelines, and cross-functional teams already covers the core concepts taught in this unit (specifically ULOs 1, 2, and 4). Plus, the hands-on hours you've logged in your professional portfolio easily clear the university's 150-hour requirement.

REQUIRED EVIDENCE FOR SUBMISSION:

- Letter of Employment / Manager's Statement
- Sanitized Project Ledger or KPI Report
- Current Resume

Unit 2: ACCE3004 - STEM Tutoring

BASIS OF WAIVER:

The time you've spent working in STEM education and practical mechanical design serves as direct proof of your professional practice. You already have the industry hours the faculty requires, meaning you shouldn't need to sit through the foundational coursework.

REQUIRED EVIDENCE FOR SUBMISSION:

- Logbook of Industry Hours
- Letter of Verification from Supervisor

Unit 3: ACCE4002 - Business Management

BASIS OF WAIVER:

You have already built a physical prototype and pitched it to Venture Capital firms. This real-world startup experience directly proves you understand market validation and business modeling, making the theoretical coursework for this unit redundant.

REQUIRED EVIDENCE FOR SUBMISSION:

- Official Pitch Deck (Sanitized for confidentiality)
- Photographic/CAD Evidence of Prototype Development
- Letter of Verification from Startup Mentor/Advisor
- Business Model Canvas or Executive Summary

What Now ?

Step 1: The Preliminary UC Check (Optional)

- Identify the current Unit Coordinator (UC) for your target unit via your university handbook.
- Send a brief, professional email outlining your intent to apply for CRL, with a summary of your evidence (you generally don't need to attach the evidence just yet).

Step 2: Gather & Refine Evidence

- Compile all specific documents listed on Page 04.
- Ensure all manager statements or verification letters are signed, dated, and on official company letterheads.
- Sanitize any sensitive financial or proprietary data from project ledgers or pitch decks.

Step 3: ValiCred Document Checkpoint (Optional)

- Some CRL applications may have a single missing detail that can trigger an automatic rejection from the faculty.
- If you would like absolute confidence that you have maximized your chance to get CRL for a given unit, you can send us the evidence you have collected thus far on valicred.com/review and we will ensure it precisely matches the strict academic criteria required for approval.

Step 4: Official University Submission

- Once your evidence is locked in, lodge your formal application through your university's official portal. For more information on where to lodge the application, contact your university.
- Ensure you submit this prior to the semester census date to avoid financial penalties.

1. Final Authority & No Guarantees

ValiCred provides independent mapping, assessment, and strategic advice based on historical data, syllabus cross-referencing, and university policy frameworks. We do not grant academic credit. The final authority to approve unit waivers or Credit for Recognised Learning (CRL) rests entirely with the university faculty and the respective Unit Coordinators.

2. International Student & Visa Compliance

It is perfectly legal and standard practice for international students to apply for and receive Credit for Recognised Learning. However, if you are studying in Australia on a student visa, you are legally required to maintain a compliant full-time study load. Successfully waiving a unit may drop you below this threshold. You **must** contact your university's International Department to confirm how this waiver impacts your study plan to ensure you remain fully compliant with your visa conditions.

3. Intellectual Property & Document Usage

This strategic report is a proprietary document custom-compiled exclusively for the named student. Do not submit this document directly to the university. It is designed to be your internal roadmap to help you build your official application. Recreating, distributing, or submitting this exact report to university staff is strictly prohibited and may result in the university dismissing your application due to third-party interference.

4. The ValiCred Guarantee

We can't guarantee your faculty will approve the application, but we're confident in our mapping process. If the university declines your CRL application after you've used our Document Verification Service, we don't think you should bear the whole cost. We'll send a \$5 refund directly to your card for each unit that gets knocked back.

About ValiCred

ValiCred helps university students turn their real-world experience into formal academic credit. We map what you've already achieved in the workforce directly to your degree's syllabus, giving you the exact evidence you need to skip redundant classes and save thousands on tuition.

We operate 100% online. By skipping the physical offices and heavy overhead, we keep our operations fast, secure, and accessible to students across any campus in Australia.

Need Further Assistance?

Navigating university administration can be complex, and faculties often reject valid applications on technicalities. If you have any questions regarding this audit, need clarification on your next steps, or require assistance appealing an unfair university rejection, please contact our team at **support.valicred@gmail.com**.
